

EtaExpress pot

The Primus EtaExpress pot fit all existing outdoor stoves on the market.

- Made of hard anodized aluminium with a multi layer titanium non stick surface on the inside
- Due to the heat exchanger on the base of the pot it reduces fuel consumption and boiling times, increasing the efficiency of your existing stove by up to 50%.
- A 1.0 litre pot perfect for solo trips, the lid also doubles as a frying pan.
- A 230g LPG canister and a stove such as the Primus express will fit inside the pot.
